OmaVero sample guide

A practical example for reviewing household-service invoices before reporting a kotitalousvähennys deduction.

2026 calculator assumptions
35% of eligible labour • €150 threshold per adult • €1,600 cap per adult

1. Gather the invoice details

Use the final paid invoice from your registered service provider. Confirm that labour is shown separately from materials, supplies, travel and vehicle costs. Only the eligible labour portion should be entered in this sample flow.

INVOICE FIELD	SAMPLE VALUE
Provider and business ID	Example Service Oy • 1234567-8
Invoice date and number	15.03.2026 • INV-2026-1042
Eligible labour	€2,000
Materials / travel	€180 (not included)

2. Calculate the sample credit

(Eligible labour spend × 35%) − deductible threshold = net credit

(€2,000 × 35%) − €150 = €550 estimated net credit

The result is then limited by the applicable annual cap: €1,600 for one adult or €3,200 for two adults. A two-adult household uses a combined €300 threshold in the Allable estimator.

3. Enter the information in OmaVero

1 Open the deduction area
Sign in to OmaVero and open the section for household expenses / kotitalousvähennys for the relevant tax year.

2 Add the service provider
Enter the provider name, business ID, invoice/payment dates and service type exactly as shown on the invoice.

3 Enter eligible labour only
Report the qualifying labour amount. Do not include materials, supplies, travel or vehicle lines.

4 Review before submitting
Compare the entries with the invoice and retain the invoice and proof of payment for your records.

Important

This document is an illustrative sample, not an official Vero form and not tax advice. Rules, eligibility, thresholds, caps and OmaVero labels may change. Always confirm current guidance with the Finnish Tax Administration and use the figures on your final invoice.
